

CGT3582

Cluster Cocktail Tomato

Features

Plant

Plant with a dark-leaved, open-growth plant, ideal for cluster harvesting. Its balanced vegetative and generative vigor ensures stable, uniform production throughout the cycle. With strong plant health, it is a reliable choice for long cycles.

Fruit

Fruits weigh 35-40g, with uniform size and cluster arrangement. Their intense red color and gloss suit the export market, while excellent post-harvest life ensures freshness and quality.

Resistances

HR Fol: 0-1, For, ToMV, St, Va, Vd

IR TYLCV, ToBRFV, Ma, Mi, Mj
